

You can make a multi-mode JavaScript calculator that switches between:

1. Normal Mode – basic arithmetic
2. Trigonometric Mode – sin, cos, tan, etc.
3. Scientific Mode – power, square root, log, etc.

Each mode shows different button layouts dynamically when the user selects one like the following.

Multi-Mode Calculator

Normal ▾

7	8	9	/
4	5	6	*
1	2	3	-
0	.	=	+

Multi-Mode Calculator

Trigonometric ▾

sin	cos	tan	C
7	8	9	/
4	5	6	*
1	2	3	-
0	.	=	+

Multi-Mode Calculator

Scientific ▾

x^2	$\sqrt{}$	log	C
7	8	9	/
4	5	6	*
1	2	3	-
0	.	=	+
